

10 years of TOUCH and love.

Have I done enough?

You might be wondering what this is. But I'm guessing that you get this thought just like I do. But not to worry. I shall explain what it is. This is a special article that is going to reveal how much impact and hope a little light that you shone is doing. It is a summary of how your love is enough for us. Because it reflects God's amazing grace and love for His people.

*So, this article is inspired by love I have received from all Canadian teams and the experience I have had volunteering for TOUCH ministries, but above all, what my eyes have witnessed especially since I grew up here and seen proof that love, really is the greatest of all gifts. Team shine shared devotionals and prayer every morning and I had the chance to hear their words of love and wisdom. One day, **Zoe** shared a devotion entitled '**have I done enough?**' and she opened my eyes to the fact that we know nothing about the future and whatever we do, has a specific impact on people around*

us. But as the group shared, I was able to learn that we don't have to do enough or save everyone, but try to do something and leave the rest to God who will finish the great work that He started in us. I hope that this article will show you how much saving one person can change a community. It could be slow, but you planted a seed and the fruits will be very sweet.

So, in case you feel sad and discouraged, just know you have:

Set up a home. The Ogooma Uganda children's home.

In a community that has been affected by various problems and pains of poverty, you have contributed to providing a home for orphans. And yes, those orphans are growing. To feel love, to smile and laugh with so many sisters and brothers they could never imagine having. To eat and rest with a peace of mind. Knowing that God is their shepherd. And they shall not lack. A place that is a shelter from a heavy hurricane of pains from loss, hunger,

insecurity and sadness. From this home, more than a hundred have felt love and see life in a different

perspective. They look forward to changing their stories for the better and glorifying God. Thank you so much for building this home. I mean, what more could a child ask for other than love?

Drawn us closer to God. TOUCH Ministries' Community Church.

A non-denominational church set up for community members to gather and worship, share and grow together. Endless testimonies have come from this church. With many more from the cell ministry and radio evangelism. It has given hundreds of children, youth and elderly something to hold on. Which is God's promise and love. Not only in Ogooma, but even in the villages and districts around. People have been given a place to gather and share God's love

through cell ministry. The church has trained so many children and has encrypted God's word in their hearts at a young age. Thank you for sharing and extending God's word to all places.

Given us good education and training. TOUCH has set up an amazing foundation for the children. The children have an opportunity to learn in order to shift their future. They are given quality education. So many children have had the grace to be sponsored and given free education due to their hard work and excellence at school. Surely, TOUCH Nursery

and primary school has made it possible for the children to have a chance of an amazing future. The rest is up to them. To keep fighting and working hard in order to transform their

homes. Even the adults have received the opportunity to learn whatever they were not able to at an

early age. And they are proud of the changes and transformations that have come up from the program. This has been possible because you have done something in order for this to happen.

Clothed us. Something that sounds small, but big in the eyes of the receiver. The spark of joy in the eyes of a child who gets to wear shoes and clothing for the first time is because of what you did. And the fact that u wipe out the pain of the wrath of the sun's direct heat on the

child's bare skin is a blessing. Thank you.

Provided aid to the hurting and helpless.

The son of God came and provided people good health and healing. And when he did, they shouted

songs of praise and thanked him for it. You have also come to share a certain type of healing and peace to those who are hurting and in

pain. By giving medical support to the people, donating medicine and health materials to people, giving nourishing supplies to children who are malnourished, sharing food with the hungry. Funded so many surgeries that have saved children. Provided clean water and drawn it closer to the community. In the community visits, you shower us with so much love and encouragement. And by doing this, people's faith in God is strengthened. Praises and glories going back to him.

Improved our livelihoods.

With so many people unable to provide for their homes, you have gifted us with wealth in form of cows, goats, chicken, land and have secured our future. You have given so many homes better lives and health due to your generosity. And this is a deed that will flow for generations and for this, God's blessing will be endless to your family too.

Prayed for us. You have helped us do so many things. most of which I have not mentioned here. But You

have always kept us in your hearts and pray for us tirelessly. Your prayers have protected us and we have become stronger and happier because of strength in prayer.

And above all, you have loved us.

With your deeds showing nothing more than a heart filled with compassion. Reminding us endlessly of God's favor and grace. Always remember than your love for us. Is more than enough. And we love you too. So many of the children and people in this community that your love has blessed never imagined that such a miracle would happen.

This is love. Just know that one way or another, you have created a strong image on what God's love is. And its patient, tolerant, and endless. Dedicated to all the people who are compassionate and devoted to sharing

the love of God with the people of Ogooma and the rest of the world. May you stay strong and blessed forever. We send you lots of thanks and love. We give glory back to God. For he has done so many things for us all and has loved us.

My favorite. how we shifted from drinking dirty water that we fetched from far, to having clean water that is safe and near home. Work has been made easier, lives have changed, infrastructures have been set up, my home is now on google maps thanks to you. No one would have known that ogooma existed.

By the way, that's me in a pink shirt fetching water in 2007 . And I was always a victim of typhoid. But not anymore.
