

OPEREGE EDISON'S IMPROVEMENT.

Amodan Joseph is sending special thanks to everyone who gave him hope by financially and spiritually supporting his son's treatment.

"My son has been unable to walk by himself properly for 7 years, because I was unable to pay for medication. But I thank you with all my heart for saving my child. I thank God for TOUCH ministries."- Joseph.

Edison was born normal. When he fell sick with malaria, he was injected with quinine medicine. His body had a very unfortunate reaction to the medicine. His leg started to shift in an abnormal way. Edison was given various medications to avoid the problem from disabling him. But sadly, his father, Amodan Joseph, ran out of money and couldn't save him. Then seven years later, he got help from TOUCH ministries.

Edison after his surgery

But after getting medical support from TOUCH ministries, he is able to walk, and run by himself. He can now play with his friends and there's hope of him getting better even when he is still wearing a training shoe.

We thank God for the child's improvement.

Joseph and his son. Edison's foot is improving and getting to the normal shape and posture
